# XionERP data sheet

Cloud ERP for growing GCC and South Asia businesses

XionERP brings accounting, sales, inventory, CRM, manufacturing, HR, projects and e-invoicing into a single platform. Every module shares the same data and posts back to one ledger.

## Dashboard

One command centre for the whole business, not eleven separate logins.

- Cross-module overview
- Live KPIs at a glance
- Role-based landing view

## Accounting & Finance

The financial core every other module posts back to.

- Chart of Accounts
- General Ledger
- Journal Vouchers
- Trial Balance
- Multi-currency & exchange rates
- Bank & cash accounts
- Received cheques (PDC tracking)

## Invoicing & Billing

From quote to cash, fully connected to the ledger.

- Quotations
- Sales invoices
- Receipts
- Sales returns
- GCC e-invoicing (Fawtara / UBL 2.1)

## Financial Reporting

Board-ready reports, generated live — not exported and patched up.

- Profit & Loss
- Balance Sheet
- Cash Flow
- VAT Return
- AR / AP Aging
- Bank Reconciliation
- Budget vs. Actual
- Credit Risk
- Day Book
- Daily Closing & Daily Sales Reports
- Liquidation Projection

## Sales & CRM

Pipeline, contacts and activity in one thread.

- CRM dashboard
- Leads
- Contacts
- Activities & tasks
- Sales pipeline

XionERP

# XionERP data sheet

Capabilities, continued

## Field Sales

A mobile-first toolkit for reps working outside the office.

- Rep dashboard
- Quick order entry
- My orders
- Collections & collection vouchers
- Customer snapshot
- Live product availability

## Purchase & Procurement

RFQ through to supplier payment, matched at every step.

- RFQs
- Vendor quotes
- Purchase orders
- Goods receipt (GRN)
- Purchase invoices & returns
- Payment vouchers
- Supplier management

## Inventory & Warehouse

Multi-location stock that stays accurate without a recount.

- Products
- Delivery notes
- Multiple warehouses & locations
- Stock transfers
- Stock adjustments
- Reorder management

## Stock & Sales Analytics

See what's moving, what isn't, and who sold it.

- Stock valuation
- Stock movement & summary
- Stock by location
- Sales report
- Sales vs. target
- Salesman performance
- Item profile report

## Analytics Center

Cross-department BI — trends, funnels and risk, not just static reports.

- KPI dashboards across finance, sales, inventory & HR
- Risk scoring (low / medium / high)
- Funnel & trend analysis
- Department-level drill-down

## Fixed Assets

Assets tracked from purchase to depreciation to disposal.

- Fixed asset register with GPS tracking
- Automated depreciation journals
- Maintenance scheduling
- Consumables tracking

# XionERP data sheet

Capabilities, continued

## Maintenance

Service calls, contracts and technicians — run like a field-service business, not bolted onto inventory.

- Service calls & service board
- Machine registry
- Preventive maintenance (PM) visits
- AMC contracts with billing & packages
- Rental tracking
- Technician productivity & job assignment
- Spare parts

## Manufacturing

From raw material to finished goods — BOMs, work orders and production costing on the same stock and ledger.

- Multi-level bill of materials (BOM)
- Work / production orders
- Production planning & scheduling
- Work centres, routing & operations
- WIP tracking
- Production costing — material, labour & overhead
- Quality control inspections
- Shop-floor job tracking, scrap & rework

## Project Management

Tasks, milestones and costing tied back to the job.

- Project detail & milestones
- Feasibility analysis
- Project costing
- PM dashboard

## HR & Payroll

A full HR system, not a bolt-on employee list.

- Employee records
- Attendance & shifts
- Leave types, requests & approvals
- Payroll & payroll components
- Organization structure
- Performance goals, cycles & reviews

## Recruitment

From job description to signed offer, tracked end to end.

- Candidate pipeline
- Interview scheduling
- Job descriptions & JD library
- Offer management
- Onboarding
- Public careers / apply page
- Manpower requisitions

### BUILT FOR THE REGION

Arabic e-invoicing, OMR to three decimals, multi-currency, IFRS-standard reporting, VAT returns, and e-invoicing built for Oman's Fawtara programme (UBL 2.1, PINT-OM aligned).

XionERP

# XionERP data sheet

Capabilities, continued

## Approvals & Governance

Control who can do what, and see who did what.

- Configurable approval workflows
- Approval inbox
- Full audit trail
- Granular permission matrix
- User groups & roles

## Compliance & E-Invoicing

Built for Oman's Fawtara mandate, not retrofitted.

- UBL 2.1 / PINT-OM structured invoices
- Peppol-ready architecture
- VAT reporting

## WhatsApp Integration

Your documents and your customer chats on WhatsApp — sent from, and answered in, Xion ERP.

- Send invoices, quotations & statements on WhatsApp
- Payment reminders & account statements
- E-signature & approval links delivered on WhatsApp
- WhatsApp inbox — every chat, answered from Xion ERP
- Photos, voice notes & documents in chat
- Meta-approved message templates
- Keep your WhatsApp Business app working on the same number
- A number per salesman, with a shared company number

## Claude AI Connector

Add Xion ERP to your own Claude as a connector and talk to your business data in plain language.

- Ask Claude: overdue receivables, sales summary, stock on hand
- Customer statements, open invoices & recent receipts
- Find customers & products by asking
- Draft quotations, invoices, delivery notes & receipts
- Every write is previewed, then confirmed — nothing posts by accident
- Your own permissions apply, exactly as on screen
- Uses your own Claude subscription — no extra AI fee
- Writing is a per-company switch, off by default

## Admin & Configuration

The settings that let you run this your way.

- Company, accounting, document & email configuration
- Feature flags
- Import / export tools
- Recurring expenses automation
- Multi-tenant Super Admin portal

## Documents & Support

Everything filed and everyone helped, in-platform.

- Central document storage across every module
- Built-in support / ticketing
