Xion Webstore

DATA SHEET

Your online shop, run from XionERP.

Xion Webstore: an online store module for XionERP

Xion Webstore shows the items, prices and stock you already keep in XionERP. Web orders land as sales orders and quotations, so there is no second system to keep up to date.

✓ Prices and stock from XionERP

One source of truth. Change a price or receive stock in XionERP and the shop follows.

✓ Orders land in XionERP

Web orders arrive as sales orders and quotations, ready to confirm and bill.

✓ Cash on delivery

Take orders from customers who prefer to pay when the goods arrive.

✓ Request a quote

Let buyers ask for a price on larger or special orders, and answer from XionERP.

✓ WooCommerce import

Bring an existing WooCommerce catalogue across instead of starting from nothing.

✓ No second system

Your team keeps working in the XionERP they already use.
