XionERP

CLOUD ERP FOR THE GCC

One platform for your whole business.

Accounting, sales, inventory, CRM, manufacturing, HR, projects and e-invoicing in a single cloud ERP, built for growing businesses across the GCC and South Asia.

xionerp.com

WHY XIONERP

Stop running your business across six disconnected tools.

Spreadsheets for accounts, one app for invoices, another for stock, WhatsApp for the sales team. The data never lines up, and month-end becomes a guessing game.

Business as usual

- ✕ Accounting in one system, sales in another
- ✕ Stock counts that never match the books
- ✕ Manual e-invoicing, compliance anxiety
- ✕ No single view of cash, receivables or profit

Business on XionERP

- ✓ One platform from quote to cash to ledger
- ✓ Sales reduce stock and post cost automatically
- ✓ GCC e-invoicing built in, compliant by default
- ✓ Live dashboards for cash, profit and aging

ONE PLATFORM, EVERY FUNCTION

Not a pile of separate apps. One platform where every module shares the same data, so your numbers, stock and customers always agree.

THE CORE

Everything connected, by design

Dashboard
One command centre for the whole business — live KPIs, role-based landing view.

Accounting
General ledger, journals, trial balance — to three decimals.

Banking & Cash
Bank accounts, PDC cheques and reconciliation.

CRM
Leads, contacts and pipeline from first touch to close.

Sales
Quotations and delivery notes through the full cycle.

Purchase
POs, goods receipt and supplier invoices, matched.

Inventory
Multi-location stock with FIFO / average costing.

Warehouse & Delivery
Multi-warehouse operations and delivery tracking, separate from stock counts.

Assets
Fixed assets with GPS tracking, depreciation and maintenance.

Project Management
Tasks, milestones and project costing.

Analytics Center
Cross-department BI — KPIs, funnels and risk scoring, not just static reports.

Reports
Financial, sales and stock reports in real time.

BEYOND THE BASICS

What most all-in-one platforms don't bundle

These usually mean a separate app, a separate contract, or both. On XionERP they are just part of the platform.

Human Resources

A full HRMS — employees, attendance, leave, payroll and performance. Most competitors sell this as a separate product.

Maintenance

Service calls, AMC contracts, PM visits and technician productivity — run field service like a business, not a bolt-on to inventory.

Field Sales

A mobile-first rep app — quick orders, collections and live stock, built for reps working outside the office.

Point of Sale

A real point-of-sale, not a workaround — built for retail and counter sales, connected to the same stock and accounts.

Manufacturing

BOMs, work orders, routing and production costing — from raw material to finished goods, with WIP flowing straight into the same stock and ledger.

WhatsApp

Send invoices, quotations, statements and reminders on WhatsApp straight from the document — and answer every customer chat from an inbox inside Xion ERP, on your own WhatsApp Business number.

Claude AI

Connect your own Claude to Xion ERP and ask it anything about your business — overdue receivables, sales, stock, statements — and even draft quotations and invoices, with every write previewed and confirmed first.

Xion Webstore

Your own online shop, run from the XionERP you already use. Prices and stock come straight from XionERP, and web orders land as sales documents.

XionERP

BUILT FOR THE REGION

Compliant in the GCC, by default.

XionERP speaks the language of regional finance: Arabic e-invoicing, OMR to three decimals, multi-currency and IFRS-standard reporting out of the box. No bolt-ons, no scramble before a deadline.

- E-invoicing ready (Fawtara / UBL 2.1)
- IFRS financials
- Multi-currency
- VAT & tax reporting

Compliance & E-Invoicing

- UBL 2.1 / PINT-OM structured invoices
- Peppol-ready architecture
- VAT reporting

Accounting & Finance

- Chart of Accounts
- General Ledger
- Journal Vouchers
- Trial Balance
- Multi-currency & exchange rates

Financial Reporting

- Profit & Loss
- Balance Sheet
- Cash Flow
- VAT Return
- AR / AP Aging

THE XION FAMILY

Products that work together

XionERP

A multi-tenant cloud ERP for mid-market businesses across the GCC and South Asia. Finance, inventory, procurement, sales and HR in one platform.

XionConnect

An omnichannel inbox connecting WhatsApp, Instagram, Facebook and more into one place, with automation, analytics and AI built in.

XionWebstore

An online shop run from the XionERP you already use. Items, prices and stock come straight from XionERP, and web orders land as sales documents.

XionTransform

A digital transformation platform that guides organisations from assessment through roadmap to measurable benefits.
